

Hey, this is the youtube video I was talking about –
“<https://www.youtube.com/watch?v=ydi3EU9IG34>”. I have shot the frames of the things in the video. I want something like this, but not necessarily like this. I’m free for any changes to be made. Try to keep the structure of the table as it is, as I have submitted a copy to my professor. But if there are any necessary changes please do it. I want you to give me a frontend.md file, I’ll copy and paste the same for antigavity to build the frontend and if good, then I’ll give you a green signal to give the codes to create the tables and insert suitable values to it. I’ll tell more about the type of data I will be needing for some values in the table. But I want the data which will be inserted as Realistic as possible. With respect to india but the trucks are European. Let’s do this –
First is the Screen which comes at opening time, I want this image –

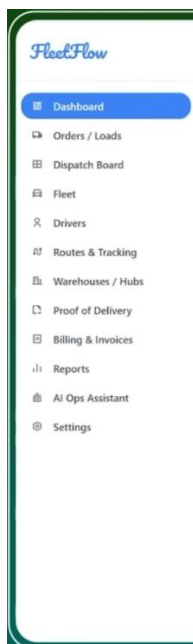

It will be in /images folder as main.jpeg

To come first and upon scrolling should make it disappears at the same spot and the login page appears, Sign in or Sign up and Username and password and when signed up for the first time, ask about their name and role. And then redirect to the Home Screen.

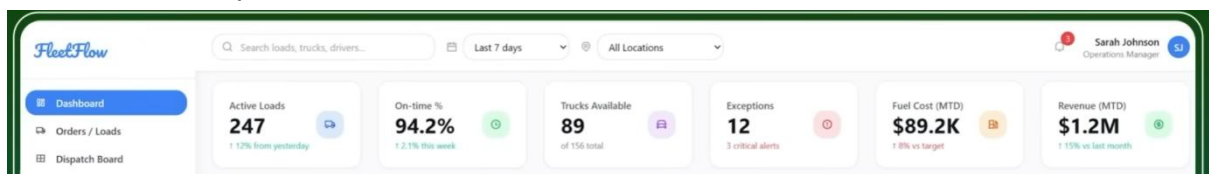

The main Home screen should look like this -

Then the left side menu –

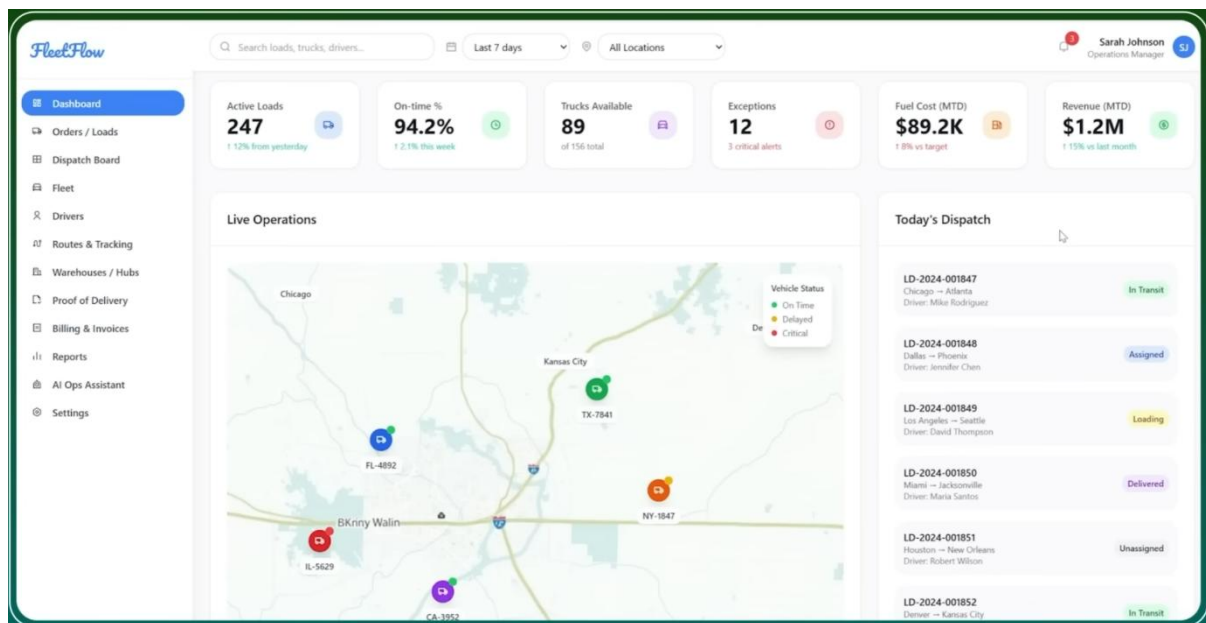

Then the main top bar -

Logo of “Fleet Force” in some nice text, a universal search bar and some filters as shown there. Then any notifications of Delivered or any issues in the bell icon and next is the Account info – name and their Role.

Then Comes the Dashboard option in the left side bar,

There should a map of india, how can we do it – with an api ? Help me with this.

We will be having 21 Trucks, 19 operating and 2 spare. 7 Volvo FH16's, 7 Scania R770's, 3 Mercedes-Benz Actros 4165 SLT and 4 DAF XG+ 660. We will be having 25 Trailers – 8 flatbed trailers (6 operating and 2 spare), 8 DRY Vans (6 operating and 2 spare), 3 refrigerated dry freight trailers (2 operating and 1 spare), 3 tank trailers (2 operating and 1 spare), 1 low boy trailer, 1 car hauler, 1 double trailer.

We will operate between locations Mangaluru M, Bengaluru B, Mumbai M, Chennai C, Delhi D and Chennai C

1 Hindusthan Oil factory at M and one warehouse at B using 1 tank trailers for oil going full and coming empty.

2 Sketchers Shoe Warehouses, one at M and one C using 2 flatbeds for shoe transport 1 going and 1 coming.

1 Havmor factory at B and 1 warehouse at C using 1 refrigerated for icecream from B to C one way and comes back empty.

Lohan Fisheries Industry at C and Warehouse in B using 1 refrigerated to transport fish form C to B and comes back empty

2 Phillips Warehouses, 1 at C and 1 at Mu using 2 Dry ones between C and Mu one going and one coming.

2 Ekart Warehouses, 1 at B and 1 at D using 2 Dry ones between B and D one going and one coming.

2 Shiprocket Warehouses, 1 at B and 1 at Mu using 2 Dry ones between B and Mu one going and one coming.

1 Jio Oil factory at K and one warehouse at D using 1 tank trailers for oil going full and coming empty.

Sohan Industries at D and K using 2 flatbeds between D and K, 1 going and 1 coming.

1 Patil Freight factory at K and one warehouse at B using 2 flatbed trailers for goods 1 going and 1 coming.

2 Delhivery warehouses, 1 in B and 1 in Mu using 1 Double back and forth.

The above ones are regular contracts.

Karan Pvt,Ltd in D using 1 Low boy from Mu to D

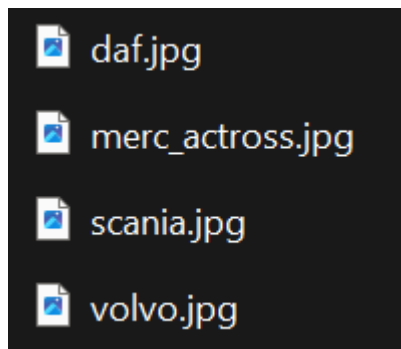

Neeraj Automotive in B using Car hauler from Mu to B

These 2 are special contracts.

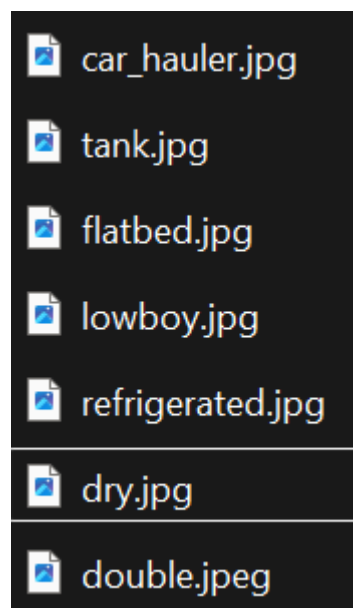

These should be displayed on the map.

Allotment will be random according to the load entered and truck availability.

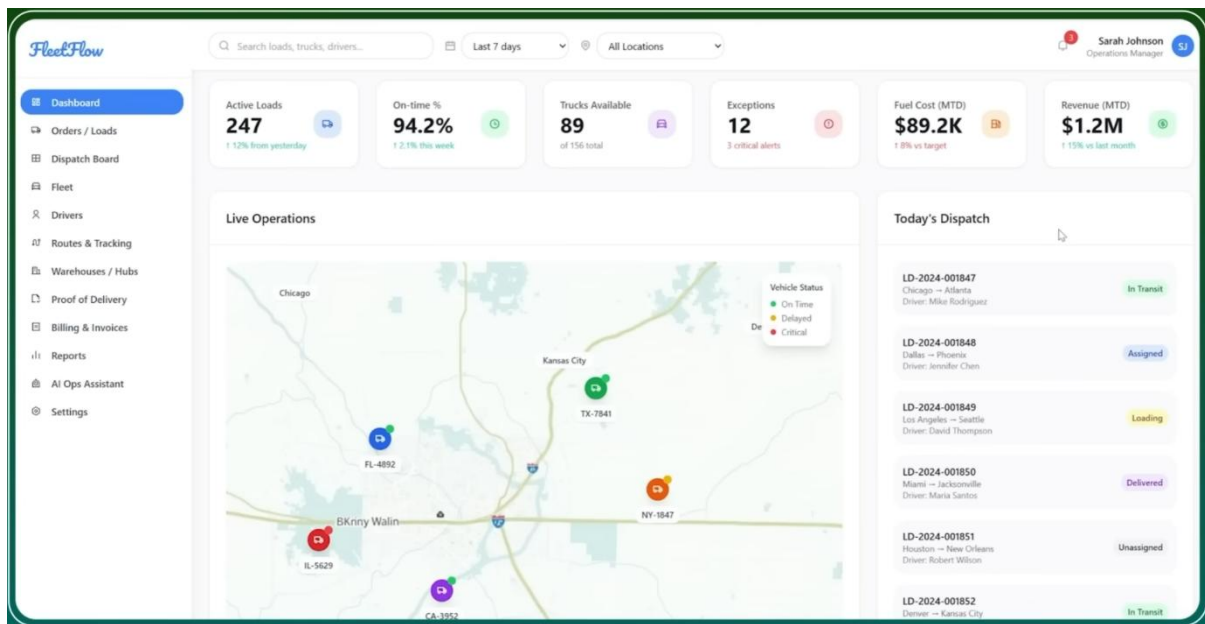

We will be having 44 Drivers. I have kept photos of 44 drivers as 1.jpg 2.jpg and till 44.jpg in /drivers and truck photos as

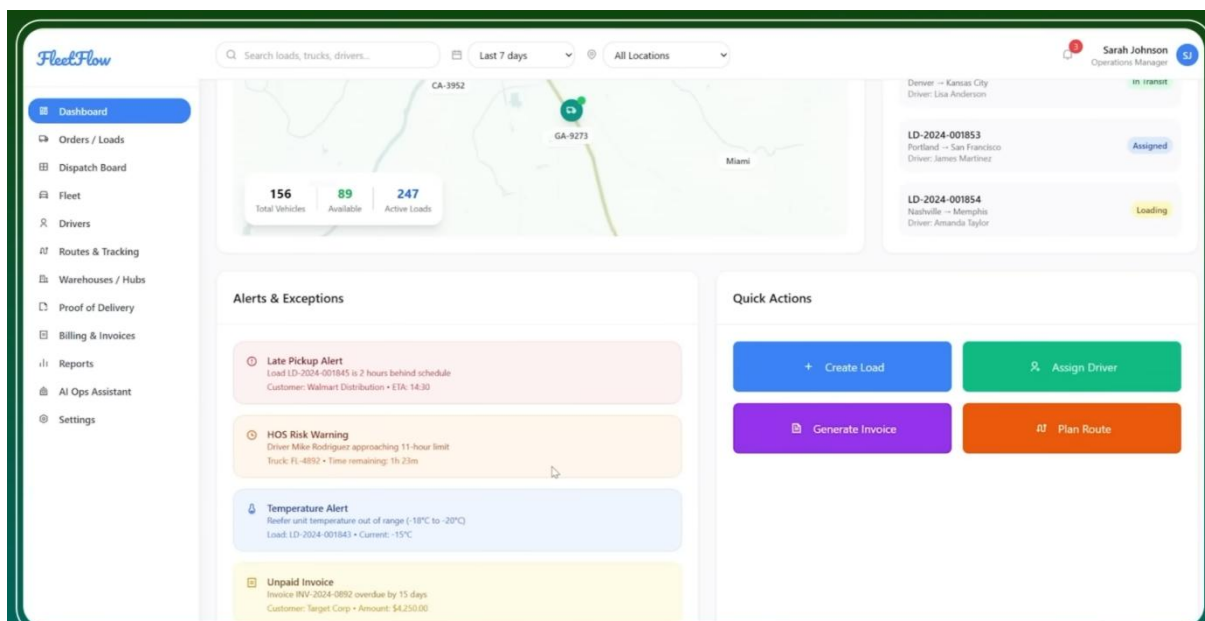

And trailer photos as

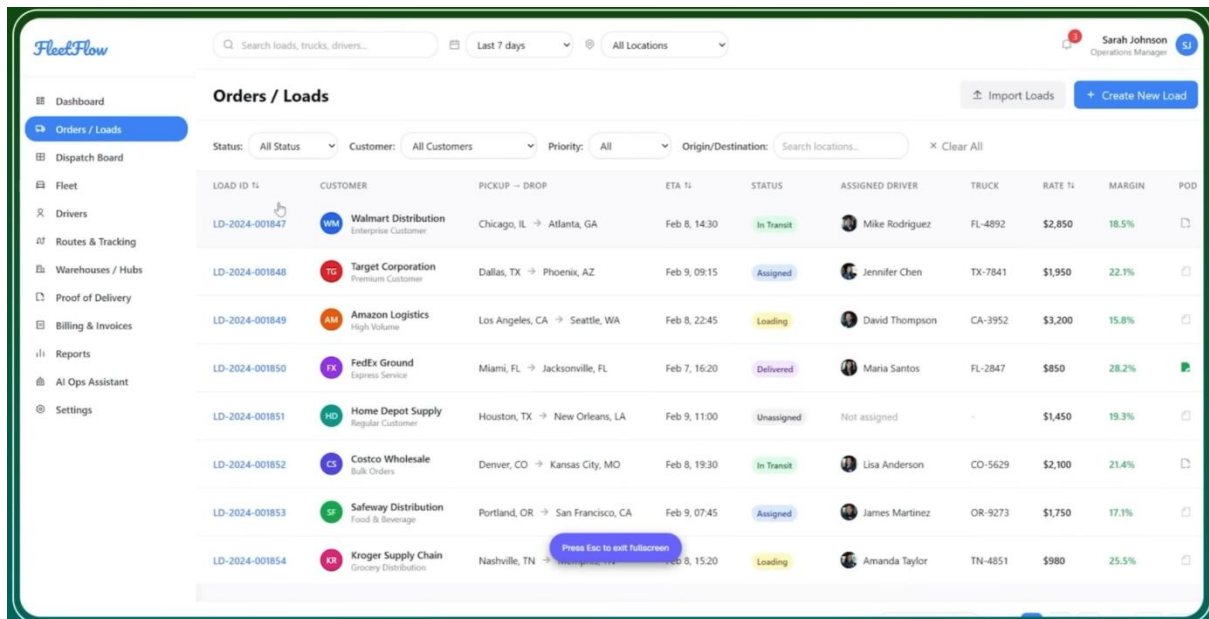

Remember, only double trailer is saved as jpeg – double.jpeg

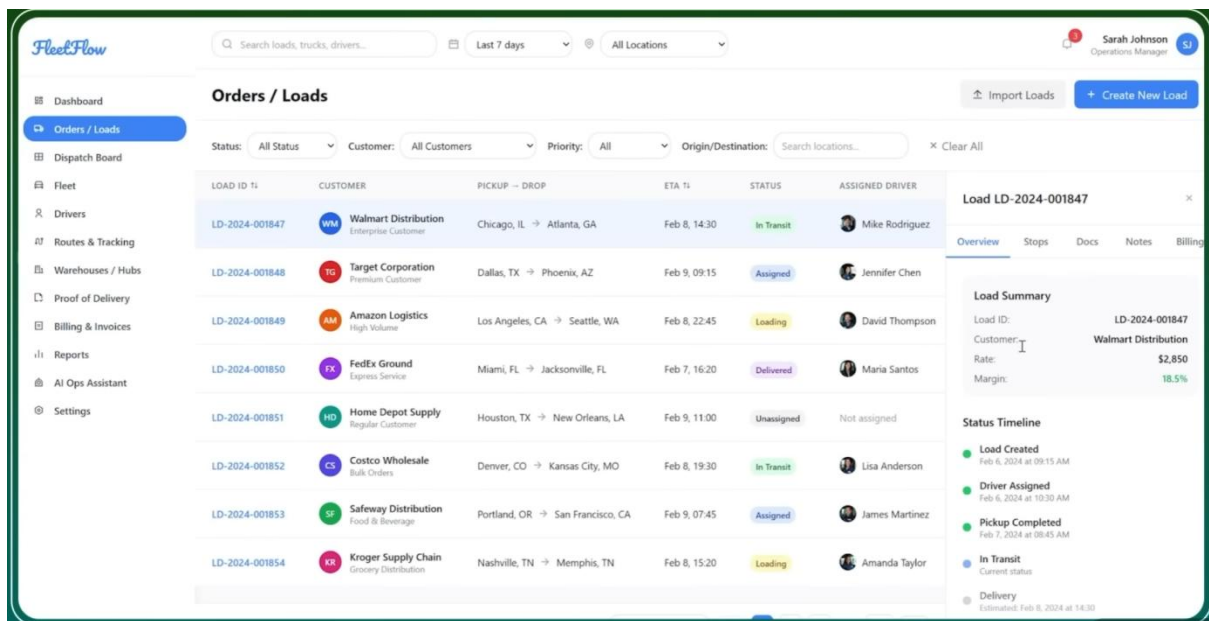

On dashboard's side should be the dispatches of today

Below should be alerts and exceptions of late pickups, temperature, hos risk and Unpaid invoice and quick actions to create load, assign driver, generate invoice and plan route. Create load should ask which warehouse to where, which type of load and recommend trailers and trucks and drivers nearby.

Then in the loads, and option to create load and optional feature to import loads to excel and all the loads and their detail. When selected a load

Should show the load summary and the timelines of all when the load was created and driver was assigned when was the pickup done, everything and from where to where

The screenshot shows the FleetFlow 'Orders / Loads' interface. The main table lists orders with columns for Load ID, Customer, Pickup/Drop locations, ETA, Status, and Assigned Driver. The right sidebar provides a detailed view for Load LD-2024-001847, including a status timeline and current location.

LOAD ID	CUSTOMER	PICKUP → DROP	ETA	STATUS	ASSIGNED DRIVER
LD-2024-001847	Walmart Distribution	Chicago, IL → Atlanta, GA	Feb 8, 14:30	In Transit	Mike Rodriguez
LD-2024-001848	Target Corporation	Dallas, TX → Phoenix, AZ	Feb 9, 09:15	Assigned	Jennifer Chen
LD-2024-001849	Amazon Logistics	Los Angeles, CA → Seattle, WA	Feb 8, 22:45	Loading	David Thompson
LD-2024-001850	FedEx Ground	Miami, FL → Jacksonville, FL	Feb 7, 16:20	Delivered	Maria Santos
LD-2024-001851	Home Depot Supply	Houston, TX → New Orleans, LA	Feb 9, 11:00	Unassigned	Not assigned
LD-2024-001852	Costco Wholesale	Denver, CO → Kansas City, MO	Feb 8, 19:30	In Transit	Lisa Anderson
LD-2024-001853	Safeway Distribution	Portland, OR → San Francisco, CA	Feb 9, 07:45	Assigned	James Martinez
LD-2024-001854	Kroger Supply Chain	Nashville, TN → Memphis, TN	Feb 8, 15:20	Loading	Amanda Taylor

Load LD-2024-001847 Details:

- Status Timeline:**
 - Load Created: Feb 6, 2024 at 09:15 AM
 - Driver Assigned: Feb 6, 2024 at 10:30 AM
 - Pickup Completed: Feb 7, 2024 at 08:45 AM
 - In Transit: Current status
 - Delivery: Estimated Feb 8, 2024 at 14:30
- Current Location:** Birmingham, AL (Last updated: 2 hours ago, Next checkpoint: Atlanta, GA (Est. 4 hours))

And current location. Can we do something like automatically the drivers location is changed when taken orders in 1:12 real world time like one minute here should be 12 minute there and it follows google maps ideal route and every minute the location updates towards the destination.

In each load, Stops

This screenshot is similar to the first one but shows the 'Route Stops' section in the sidebar for Load LD-2024-001847, detailing pickup and delivery locations and times.

LOAD ID	CUSTOMER	PICKUP → DROP	ETA	STATUS	ASSIGNED DRIVER
LD-2024-001847	Walmart Distribution	Chicago, IL → Atlanta, GA	Feb 8, 14:30	In Transit	Mike Rodriguez
LD-2024-001848	Target Corporation	Dallas, TX → Phoenix, AZ	Feb 9, 09:15	Assigned	Jennifer Chen
LD-2024-001849	Amazon Logistics	Los Angeles, CA → Seattle, WA	Feb 8, 22:45	Loading	David Thompson
LD-2024-001850	FedEx Ground	Miami, FL → Jacksonville, FL	Feb 7, 16:20	Delivered	Maria Santos
LD-2024-001851	Home Depot Supply	Houston, TX → New Orleans, LA	Feb 9, 11:00	Unassigned	Not assigned
LD-2024-001852	Costco Wholesale	Denver, CO → Kansas City, MO	Feb 8, 19:30	In Transit	Lisa Anderson
LD-2024-001853	Safeway Distribution	Portland, OR → San Francisco, CA	Feb 9, 07:45	Assigned	James Martinez
LD-2024-001854	Kroger Supply Chain	Nashville, TN → Memphis, TN	Feb 8, 15:20	Loading	Amanda Taylor

Load LD-2024-001847 Route Stops:

- Pickup (Completed):** Walmart Distribution Center, 1425 W Roosevelt Rd, Chicago, IL 60608. Scheduled: Feb 7, 08:00 - 10:00. Actual: Feb 7, 08:45. Special Instructions: Use dock door #12. Contact supervisor for access.
- Delivery (In Progress):** Walmart Supercenter #1234, 2500 Cobb Pkwy SE, Atlanta, GA 30339. Scheduled: Feb 8, 14:00 - 16:00. ETA: Feb 8, 14:30. Special Instructions: Call store manager 30 minutes before arrival. No weekend deliveries.

All these details should be there and for each load id, create a folder and be able to upload a documents for each required thing should be uploadable and openable to the default pdf opening thing in device.

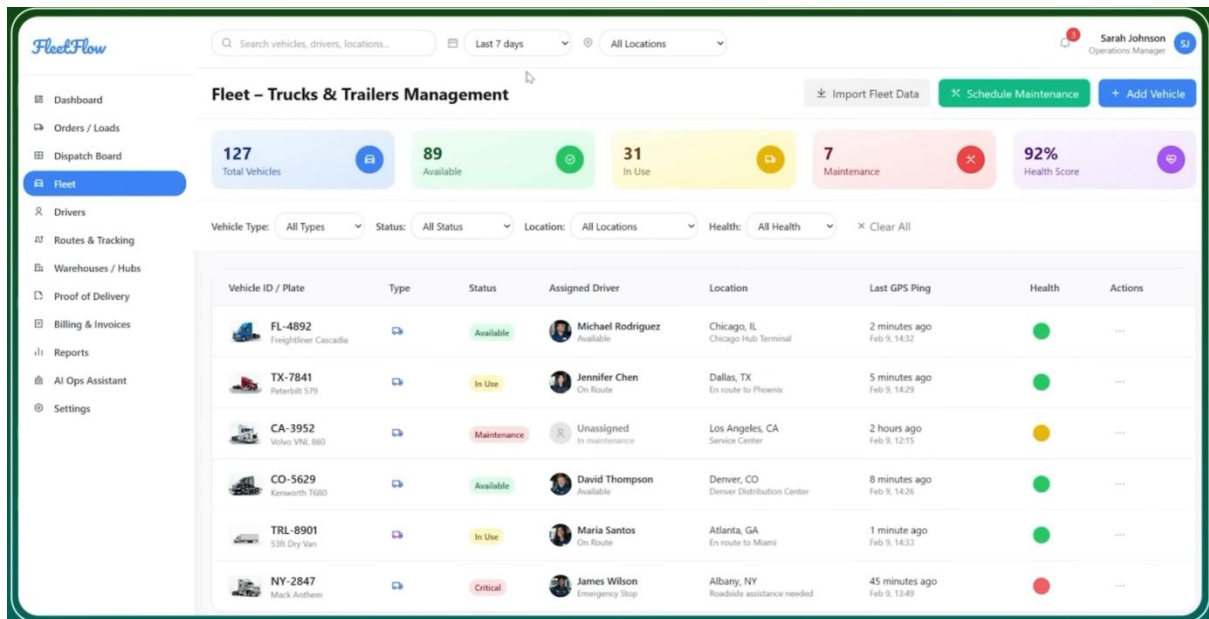

Then comes the dispatch board

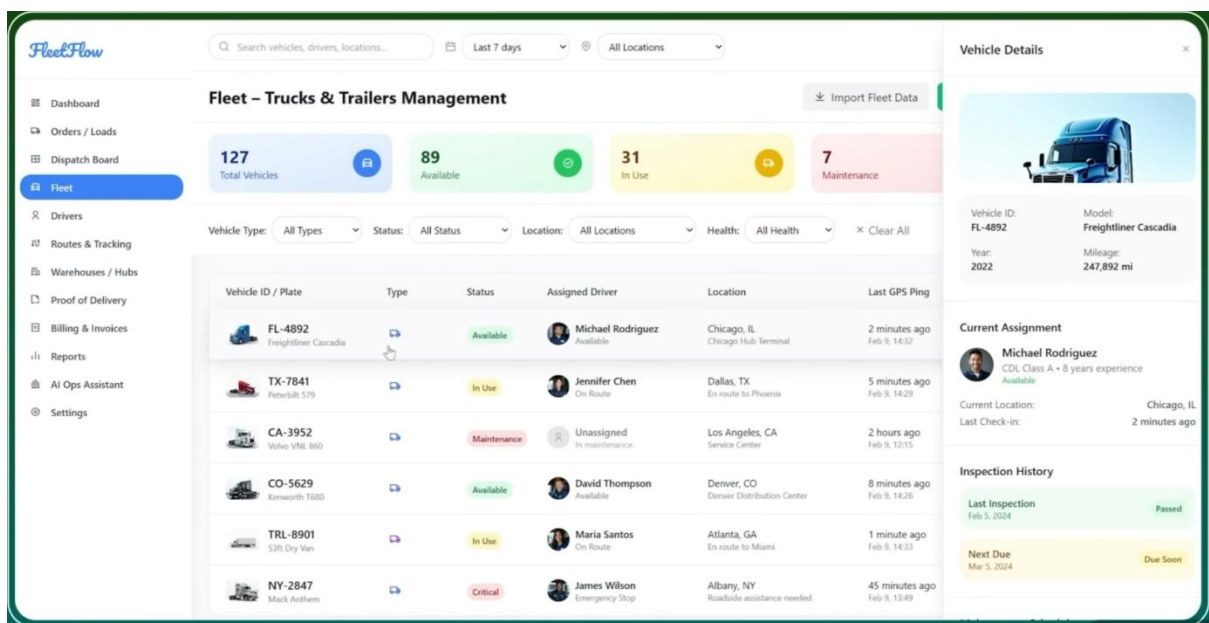

About the unassigned loads, assigned , all loads's statuses should be visible here

And should be openable to check its details

Then is Fleet, trucks and their trailers and their current drivers and all the load and destination details should be visible here. When opened all the truck, trailer and driver photo should be visible.

The vehicle details and maintenance history should be visible here

Then the drivers menu

The screenshot shows the FleetFlow Driver Management interface. At the top, there's a search bar and filters for 'Last 7 days' and 'All Locations'. Below this, a summary bar displays key metrics: 127 Total Active Drivers, 84 Available Now, 12 HOS Risk Alerts, and a 4.6 Average Rating. A sidebar on the left lists navigation options like Dashboard, Orders / Loads, Dispatch Board, Fleet, Drivers (selected), Routes & Tracking, Warehouses / Hubs, Proof of Delivery, Billing & Invoices, Reports, AI Ops Assistant, and Settings. The main area features a table of drivers with columns for Driver, Status, HOS Risk, Rating, Last Trip, Current Location, and Actions. The table lists five drivers: Michael Rodriguez (Available, 4.9 rating), Jennifer Chen (On Trip, 4.7 rating), David Thompson (Off Duty, 4.8 rating), Maria Santos (On Trip, 4.6 rating), and James Wilson (Available, 4.9 rating).

Driver	Status	HOS Risk	Rating	Last Trip	Current Location	Actions
Michael Rodriguez DRV-001 • CDL Class A 8 years experience	Available	Low	★★★★★ 4.9	Chicago → Atlanta Completed Feb 8, 2024	Chicago, IL Chicago Hub Terminal	...
Jennifer Chen DRV-002 • CDL Class A 5 years experience	On Trip	Medium	★★★★☆ 4.7	Dallas → Phoenix In progress • ETA Feb 10	Dallas, TX En route to Phoenix	...
David Thompson DRV-003 • CDL Class A 12 years experience	Off Duty	High	★★★★★ 4.8	Denver → Salt Lake City Completed Feb 7, 2024	Denver, CO Rest period - 34hr reset	...
Maria Santos DRV-004 • CDL Class A 6 years experience	On Trip	Low	★★★★☆ 4.6	Atlanta → Miami In progress • ETA Feb 9	Atlanta, GA En route to Miami	...
James Wilson DRV-005 • CDL Class A 9 years experience	Available	Low	★★★★★ 4.9	New York → Boston Completed Feb 8, 2024	Albany, NY Rest area - 1:00	...

All drivers and their details of where they are going and the allotted vehicle details should be visible here. When selected a person, the details of him like photo, name, age, license number and all other details should be visible

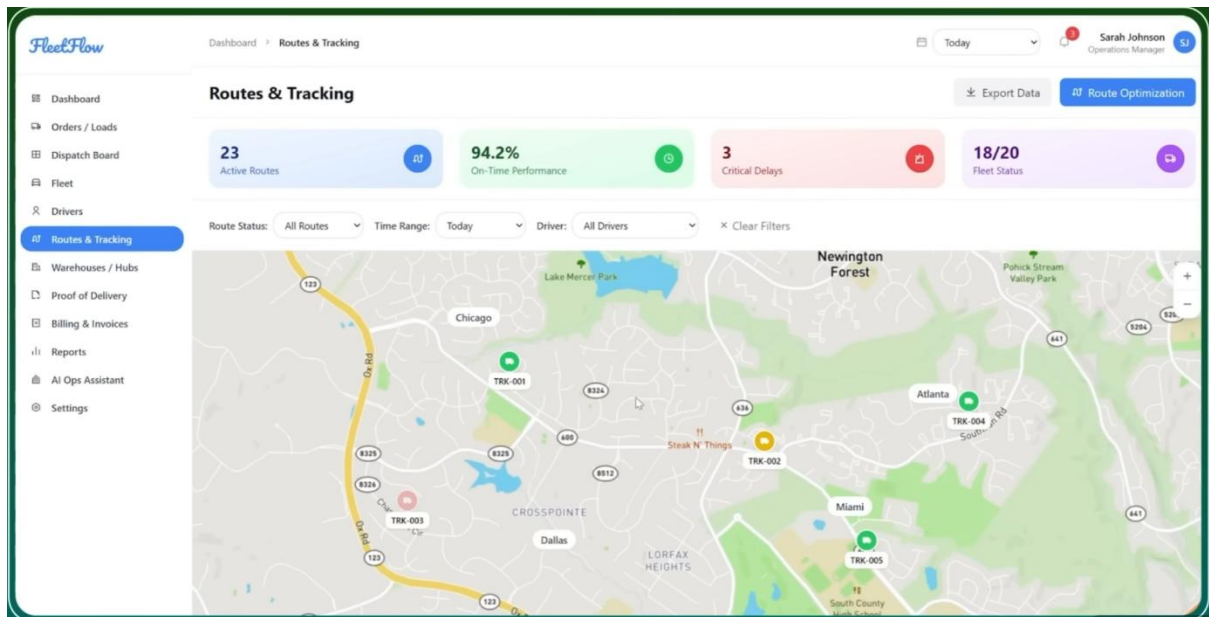

This screenshot shows the same FleetFlow Driver Management interface, but with the 'Driver Profile' sidebar open for Michael Rodriguez. The sidebar provides detailed information about the selected driver, including his photo, name, experience (8 years), phone number ((555) 123-4567), email (m.rodriguez@fleet.com), license (CDL Class A), and rating (4.9). It also lists compliance and documents: CDL License (Valid, expires Dec 15, 2025), Medical Certificate (Valid, expires Aug 22, 2024), and HazMat Endorsement (Renew Soon, expires Mar 10, 2024). The 'Hours of Service' section shows Drive Time Remaining (8h 45m), On Duty Time (5h 15m), and a 70-Hour Recap (42h remaining).

Driver	Status	HOS Risk	Rating	Last Trip
Michael Rodriguez DRV-001 • CDL Class A 8 years experience	Available	Low	★★★★★ 4.9	Chicago → Atlanta Completed Feb 8, 2024
Jennifer Chen DRV-002 • CDL Class A 5 years experience	On Trip	Medium	★★★★☆ 4.7	Dallas → Phoenix In progress • ETA Feb 10
David Thompson DRV-003 • CDL Class A 12 years experience	Off Duty	High	★★★★★ 4.8	Denver → Salt Lake City Completed Feb 7, 2024
Maria Santos DRV-004 • CDL Class A 6 years experience	On Trip	Low	★★★★☆ 4.6	Atlanta → Miami In progress • ETA Feb 9
James Wilson DRV-005 • CDL Class A 9 years experience	Available	Low	★★★★★ 4.9	New York → Boston Completed Feb 8, 2024

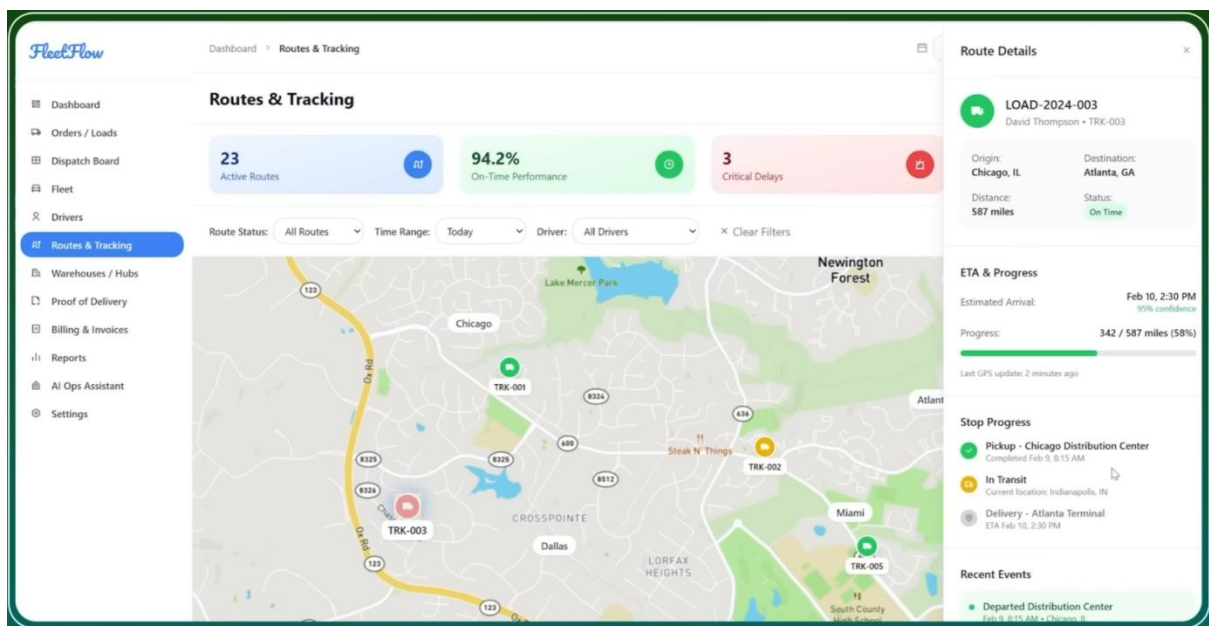

Driver Profile

Michael Rodriguez
DRV-001 • 8 years experience
Phone: (555) 123-4567 | Email: m.rodriguez@fleet.com
License: CDL Class A | Rating: ★★★★★ 4.9
Compliance & Documents
CDL License: Valid (Expires Dec 15, 2025)
Medical Certificate: Valid (Expires Aug 22, 2024)
HazMat Endorsement: Renew Soon (Expires Mar 10, 2024)
Hours of Service
Drive Time Remaining: 8h 45m
On Duty Time: 5h 15m
70-Hour Recap: 42h remaining

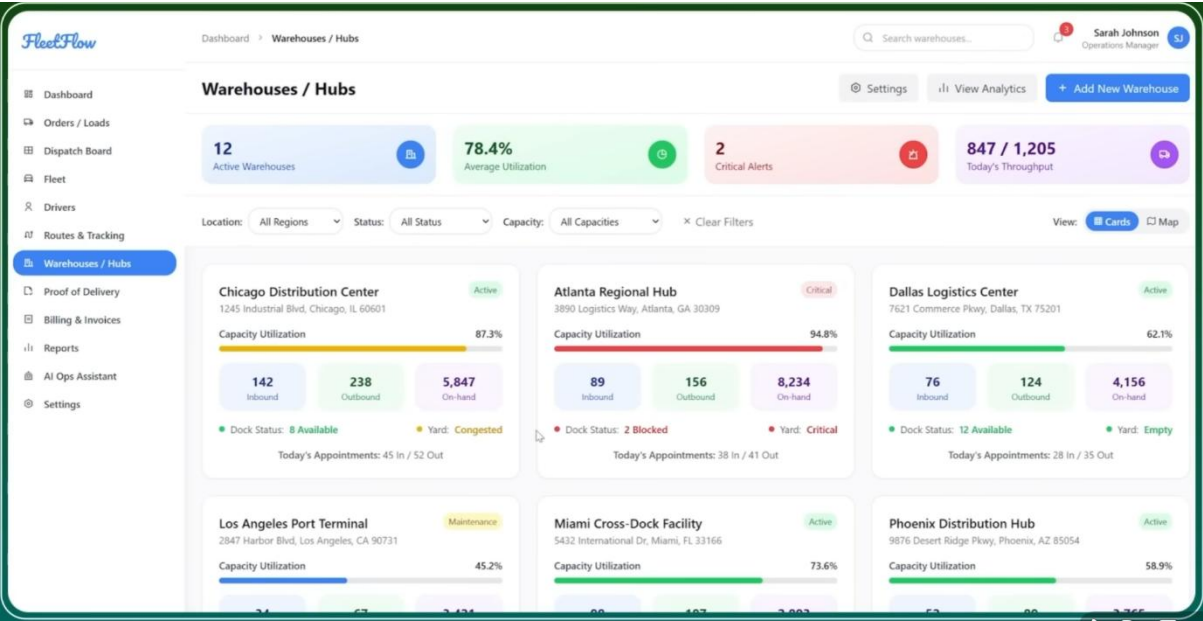

Then comes the routes and tracking

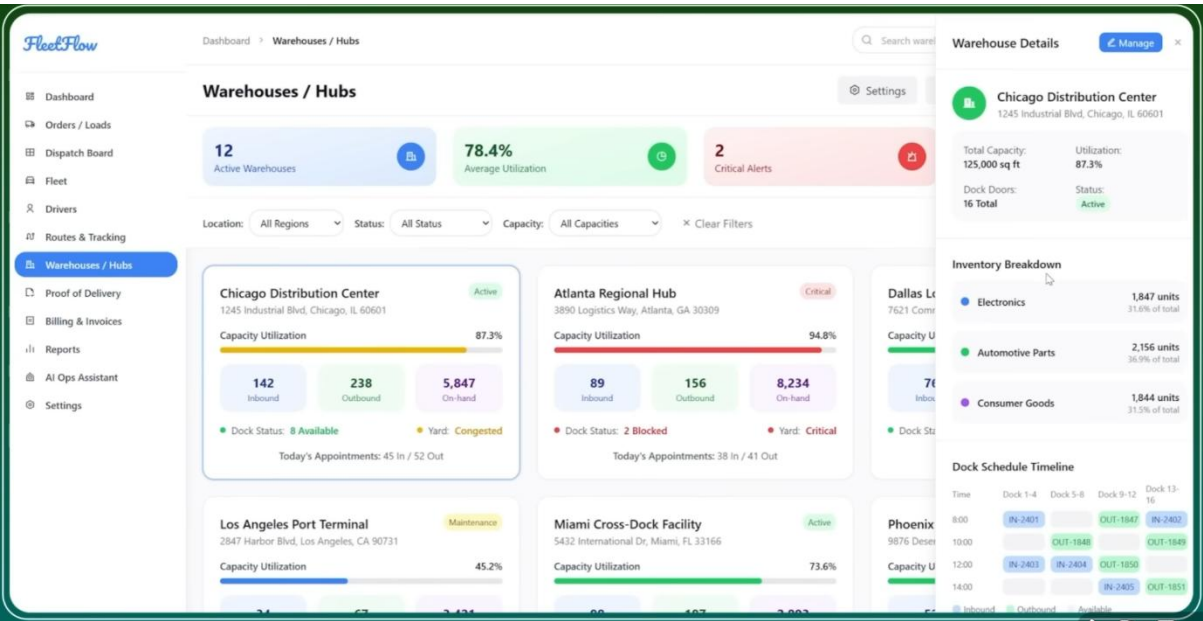

Here, the map should open and which delivery is going where and its current location should be displayed, even if all the deliveries are marked on their map with route or a selection of deliveries showing its routes.

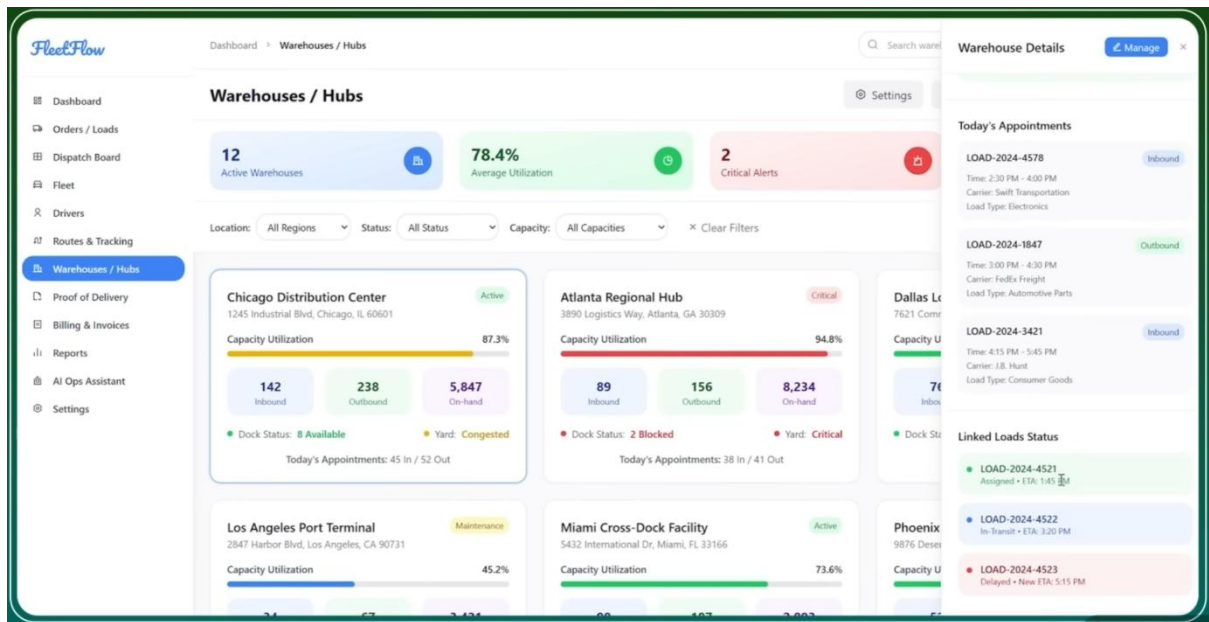

This is warehouses menu,

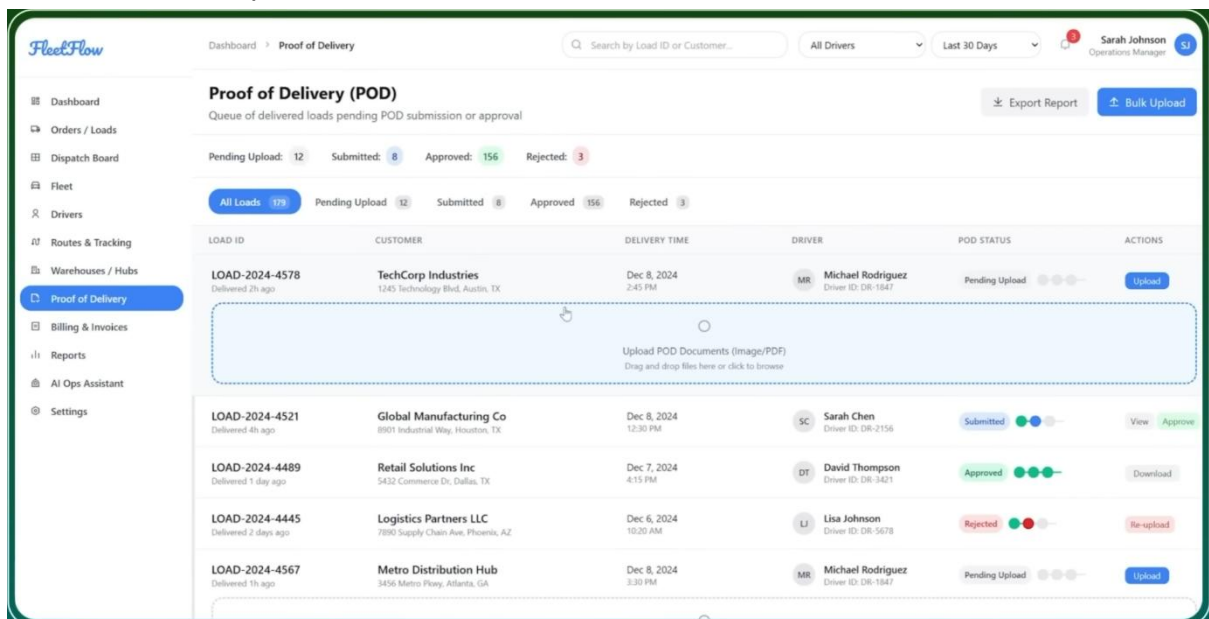

All warehouses and factories and fill in random details for it like the image.

I don't need any pod menu I guess, let's skip that.

But I'll include its photos

Customer Billing Profile

And moving on to Reports, it is the most important part, it should be made well and good looking.

No need for exporting options I guess. Then comes Ai-Ops assistant. See what all can be implemented using this

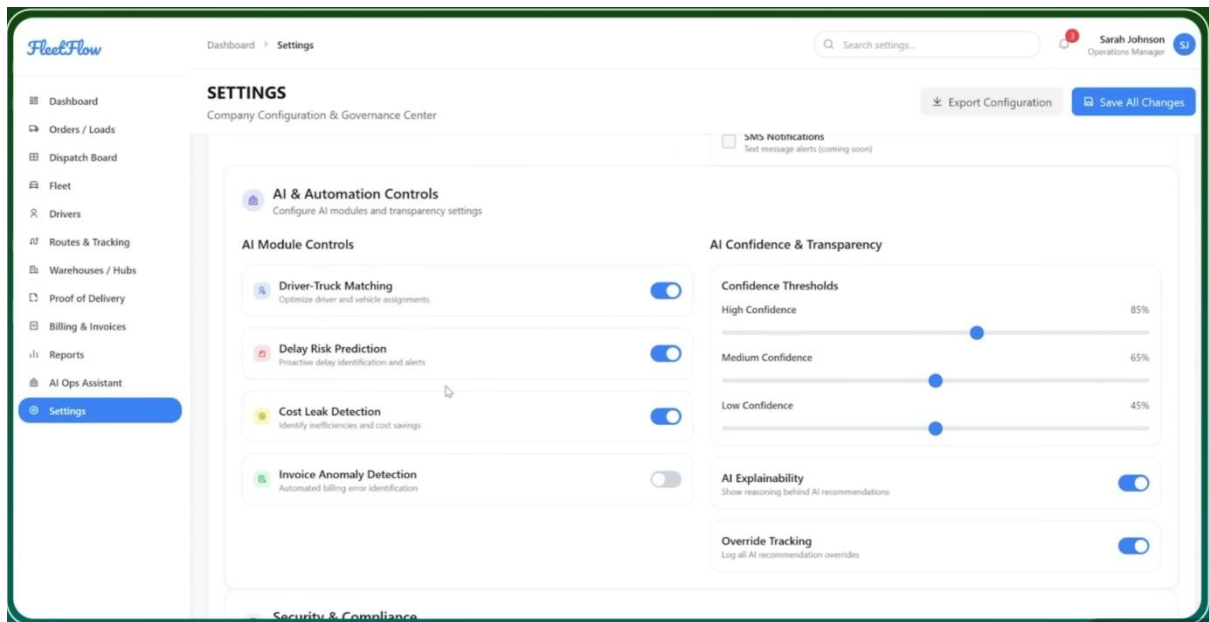

Then the Settings menu -

The screenshot shows the 'AI OPS ASSISTANT' dashboard in the FleetFlow application. The left sidebar contains a navigation menu with options: Dashboard, Orders / Loads, Dispatch Board, Fleet, Drivers, Routes & Tracking, Warehouses / Hubs, Proof of Delivery, Billing & Invoices, Reports, AI Ops Assistant (highlighted), and Settings. The main header includes the FleetFlow logo, a breadcrumb 'Dashboard > AI Ops Assistant', a search bar 'Search insights...', and a user profile for Sarah Johnson (Operations Manager). A yellow warning banner at the top states: 'AI assists operations. It does not auto-dispatch, move loads, or execute financial actions. All decisions remain human-controlled.' Below this, the 'AI OPS ASSISTANT' section is titled 'Decision Support & Operational Insights' and includes 'View History' and 'AI Settings' buttons. The dashboard displays several operational insights:

- Cost Leak Detection** (Data Source: Fleet):
 - Fuel Inefficiency - Truck T-189**: 15% above fleet average, aggressive driving patterns detected. Impact: **-\$2,340**. Actions: [Driver Training](#), [Route Optimization](#), [Dismiss](#).
 - Deadhead Miles - Route 15**: 23% empty miles, backhaul opportunities missed. Impact: **-\$1,890**. Actions: [Find Backhaul](#), [Dismiss](#).
 - Missed Accessorials**: Detention charges not billed, loading fees missed. Impact: **-\$950**. Actions: [Review Billing](#), [Dismiss](#).
- Invoice & Billing Anomalies** (Data Source: Billing):
 - Missing Charges - INV-24-3847**: Fuel surcharge not applied, detention fees missing. Impact: **+\$1,250**. Actions: [Update Invoice](#), [Dismiss](#).
 - Duplicate Invoice - INV-24-3821**: Same load billed twice, customer notification required. Impact: **-\$3,200**. Actions: [Void Duplicate](#), [Contact Customer](#), [Dismiss](#).
 - Rate Mismatch - Load L-4729**: Invoiced rate differs from contracted rate by \$180. Action: [Review](#). (Buttons: [Verify Contract](#), [Dismiss](#))

The screenshot shows the 'SETTINGS' page in the FleetFlow application. The left sidebar is identical to the previous screenshot, with 'Settings' highlighted. The main header includes the FleetFlow logo, a breadcrumb 'Dashboard > Settings', a search bar 'Search settings...', and a user profile for Sarah Johnson (Operations Manager). The 'SETTINGS' section is titled 'Company Configuration & Governance Center' and includes 'Export Configuration' and 'Save All Changes' buttons. The settings are organized into three tabs: 'Configure', 'Configure', and 'Connect' (highlighted). The 'Notifications & Alerts' section is active, with the subtitle 'Configure alert rules and communication preferences'. It is divided into two main areas:

- Event-Based Rules**:
 - Delivery Delays**: Notify when ETA exceeds 30 minutes. ☒
 - Route Exceptions**: Alert on route deviations > 5 miles. ☒
 - Billing Issues**: Invoice discrepancies and payment delays. ☐
 - Vehicle Maintenance**: Scheduled maintenance reminders. ☒
- Alert Sensitivity & Channels**:
 - Sensitivity Level**:
 - ☐ Low: Critical issues only
 - ☒ Medium: Important operational alerts
 - ☐ High: All system notifications
 - Communication Channels**:
 - ☒ In-App Notifications: Real-time dashboard alerts
 - ☒ Email Alerts: Send to registered email address
 - ☐ SMS Notifications: Text message alerts (coming soon)

All this is just reference, our project should be better. Make any necessary changes like addition or deletion. But I have one addition, I want a Queries menu in the left bar and there, all the queries which are executing should be printed or appear there and the outputs received in the form of the codes also should be written there. The data which will be inputted should be realistic cause it is like a dream project to me and it should turn out good.

What do you think about this, any changes to be made? Let's discuss it and then after that only you give me a frontend.md file to give along with this for antigravity. Let's do this, don't give any queries to create tables now only, let's clarify any requirements and discuss it first.
